TRAININGS & PROJECTS UNDERTAKEN

Industrial training:

Company: **Prakash Asphaltting And Toll Highway Engineering**

Description: Worked as an intern, during construction of a state highway joining Khandwa-Dehtalai- Burhanpur Project (M.P). We were provided with opportunity to conduct the test at Quality Control Lab, to study the basic of pavement design, RMC plant, crusher plant, to understand the organizational behavior and practical learning about project management.

Minor Project: Use of confined masonry in construction of earthquake resistant building

Description: It is a technology that offers alternative to unreinforced masonry and RC framed construction. It consists of small size of members as compared to other techniques so it is more cost effective and requires less amount of time. It has great potential to save life and property in area of seismic activities

Major Project: Study, analysis and design of a Pharmaceutical Industrial Wastewater Treatment Plant.

Description: The project covers the mechanisms and processes used to treat water that have been contaminate in some way by huge quantities of chemical and biological primary substances, required for making the medical products, prior to its release into the environment for its re-use at a Pharmaceutical company named Syncom situated at Selaqui (Dehradun).

Institution: Cadd Centre, Allahabad

Program Title: AUTO CAD 2012

Description: Building design using AutoCad which includes 2D drafting, 3D modeling.
