

PROJECT MANAGEMENT PROFESSIONAL - PROJECT ENGINEER CIVIL

Successful track record of executing prestigious projects within defined cost/time parameters, managing entire operations with key focus on bottom line profitability by ensuring optimal utilization of resources under pressure to achieve the master construction schedule

Executive summary

- Competent, diligent and result oriented civil engineer with **11 years (EPC)** experience in high valued projects with knowledge of **Quality systems, Building, Highway standards** and modern **Construction technology**
- Currently spearheading functions as **project engineer civil** in china petroleum engineering & construction corps (**CPECC**) in diverse areas like **project management, construction supervision** and manpower management
- Professional competencies in reviewing the technical and commercial aspects of the project, preparing **proposals, budgeting**, implementing **cost reduction** processes while ensuring quality benchmark of the projects
- Articulate communicator, skilled at effectively collaborating with **clients, designers, consultants** to freeze the technical parameters, work scope to iron out any ambiguities and providing technical validation for project
- Referring American standards (**AASHTO, ASTM**), British standards (**BS, FS**), Asphalt manual (**AIM**), **SHELL DEPs** & Abu Dhabi municipality standards (**ADM**), Health & Safety norms (**HSE Guidelines**) to solve the site disputes
- Expertise in supervise and manage project activities including **project scheduling** and **resource allocation** with conceptualizing and optimizing resource utilization for maximizing productivity with streamlining operations
- Identifying critical issues related to site activities and ensuring timely resolution of queries with **Field change requests (FCR)** for uninterrupted construction; Implementing strategies for building team spirit

Core competencies

EPC □ Oil and Gas □ Onshore □ Green field □ Brown field □ Upstream □ cross country pipeline □ Earth work □ Infrastructure □ Highways □ Road □ Bridges □ Culverts □ Piling □ stone/concrete foundations □ Under passes □ Tunnels □ Utility □ Drain Work □ Asphalt □ Substations □ Oil Plants □ Well Heads □ OHL Tower □ Gatch Pads □ Tank farms □ oil storage tanks □ AutoCAD, SAP □ Construction □ Site Engineering
Civil Project Management □ Site Construction Management □ Planning & Scheduling □ Quality Assurance Drawings & Documentation □ Crisis Management □ Analytical Skills □ Material Management

Professional Experience

China petroleum Engineering & Construction Corporation (CPECC) 16 Project Engineer (Oil & Gas, Infrastructure)	Since Dec
AL Tasnim Enterprises LLC (Project Engineer – Bridge & Road) Nov 16	Sep 14 to
Yuksel Inshaat A.S (Site Engineer) to Aug 14	Oct 11
Larsen & Toubro Limited (Site Engineer) Sep 11	Jul 06 to

Achievements

- **Saved approx. 16.50 million AED** by replacing fill material from engineering fill to general fill
- **Saved approx. 0.53 million OMR** by finding natural soil and water resource at wadis with proper approval from municipality and ministries instead of buying them from market
- Successful achievement of **7.5 million safe man hours** without LTI in Lusail CP4 project
- Successful achievement of **6 million safe man hours** in salwa project
- Completion of 2.3 km road without damage of any underground utilities like QTEL, QAF, TSE, DSSS, storm water, Potable water, foul sewer system, irrigation line, land drain and sewerage system
- Achievement of **8 days cycle** for slab of 13000 sq.ft by using table formwork system

Projects Undergone

EPC Contractor	China Petroleum Engineering and Construction Corporation (CPECC)
Title	EPC for Mender field development project - phase 1, Mender Oil Field; Abu Dhabi, UAE
Client	Abudhabi company for onshore petroleum operations limited (ADCO); value - 1.14 billion AED
Nature of work	Greenfield & Brown field construction. (110 wells - oil producers, water injectors & disposal) Overhead line (OHL), substation, 3", 4", 8", 14" Nitrogen and crude oil pipeline, Asphalt road.
Role	Project Engineer- pipe line/flow line, duct banks, culvert, asphalt road and landscaping
Responsibilities,	<ul style="list-style-type: none"> ➤ Preparing project execution plan (PEP), method statements (MS), construction schedule (P6 Program), manpower and machinery histograms, S curve in association with planning department ➤ Finalising project quality plan (PQP), inspection test plan (ITP), material approval sheet (MAS/MAR), project HSE plan along with QA/QC and HSE department with shop drawings submission log ➤ Reviewing project drawings and raising technical query and FCR to design consultant very periodically and drafting official letters to communicate with consultant and various subcontractors ➤ Executing all civil related works in substation, gathering station(chemical, potable water skid), oil well heads, OHL Tower and oil pipeline sleepers, berms and beds installation ➤ Supervising and guiding various subcontractors for some special works like topographic survey, existing utilities identification, road marking with continuous micro level monitoring to get the progress ➤ Regularly participating weekly construction progress meeting with employer and subcontractor to contribute and implement the resolution points on site to attain the progress as per baseline program ➤ Close cooperation with QA/QC and HSE departments in order to ensure, the work is being performed adhering to specification and AFC drawing within stipulated time by promoting pro-active approach. ➤ Construction of pipe culverts, flow line duct banks, soil stabilisation with slope protection in dune sand hill; Laying of sub grade, aggregate base course(ABC), asphalt pavement like base and wearing courses ➤ Median barrier, curb stone, interlock fixing, Construction of speed humps, installation

of **traffic sign boards**, concrete posts and **bollards**, reflecting studs and **road lane marking** using **thermoplastic paint**

- Execution of cutting and filling works for asphalt road **embankment**, pipe line and various foundations; As-built drawings preparation with all related information for final submission to client

EPC Contractor	Al Tasnim Enterprises LLC
Title	Construction of internal roads at Al-Amerat part 2; Muscat - Oman
Client	Muscat Municipality; Project value - 14.5 Million Omani Rials .
Nature of work	Culvert, road, pipeline, rock cutting, utilities, slope protection & asphalt- 40 KM. (EPC)
Role	Project Engineer- Bridge, culvert, Hill (mountain) roads, pipe line, slope stability and utility works.
Responsibilities,	
<ul style="list-style-type: none"> ➤ Establishing site office with all facilities for client, consultant and contractor. very close coordination with client, vendors, designers and various government ministries for data collections, NOC and approvals ➤ Preparing project execution plan (PEP), method statements (MS), project quality plan (PQP), inspection test plan (ITP), material approval sheet (MAS / MAR) along with QA/QC department ➤ Finalising project HSE plan, construction schedule (P6 Program), manpower and machinery histograms, S curve in association with HSE and central planning department with shop drawings submission log ➤ Negotiation and Finalising various subcontractors for some special works like blasting, topographic survey, existing utilities identification and micro level monitoring to get the progress ➤ Execution of pipeline work such as storm water, potable water, irrigation , land drain, sewerage system, raw water pipeline using DI , BWSC, HDPE, UPVC, GRP and vitrified clay pipes ➤ Carrying out rock cutting, shotcrete, rock/soil stabilisation, mass filling, fire hydrant, Irish crossing, (Box, slab, pipe, single & multi cells) culverts, outer RCC drain, canal earthwork and lining ➤ Laying sub grade, granular sub base(GSB), aggregate base course(ABC), asphalt base course, wearing course for rigid/flexible pavement using polymer modified bitumen ➤ Construction of speed humps, installation of traffic sign boards, concrete posts/bollards, reflecting studs road lane marking and temporary traffic diversion 	

EPC Contractor	YukSel - Midmac joint venture
Title	Lusail expressway primary infrastructure-construction package 4; Doha - Qatar
Client	Qatari Diar; Project value - 1.6 Billion Qatari riyal
Nature of work	PSC Box girder bridges, fly over, micro tunnels, interchange, elevated highways & pipelines (EPC)
Title	Salwa Road--Phase II. Doha Expressway Package 7; Doha - Qatar
Client	Ashghal ; Project value - 1.2 Billion Qatari Riyal
Nature of work	Box girder / truss bridges, underpasses, pipelines, highways and utilities (EPC)
Role	Site engineer - Box girder bridge, under pass, pipe line, highways and utility works

Responsibilities,

- Execution of **grading, excavation, earth moving, filling, compaction, soil stabilisation, ground anchors, geo textile, structural fill, blinding , water proofing** and protection screed for embankment
- Boring, casting, cutting and grouting of **cast in situ**, continuous, barrette, **shoring, friction/cohesion piles** with appropriate **integrity, Plate bearing, lateral load, dynamic, reaction** and **tensile load tests**
- Deep excavation of access shafts by **Tunnel Boring Machine(TBM)** for **micro-tunnelling** and **trencher machine** for pipeline works with continuous **dewatering** by boreholes to maintain ground water table
- Construction of RCC structures like **mass raft, pile cap, pier, earth retaining wall , tunnel, truss column, head walls, base slab, deck slab**, concourse slabs using **doka , peri, acrow** form work systems
- Casting of superstructure approach slab, vehicular **underpass, interchange, abutments, bearing pedestals, parapet wall**, installation of bearing and expansion joints filling
- Complete cable profile, staging erection , launching girders, dry matching, gluing of segments, piers fixing, anchorage, stressing and grouting of **PSC box girder** integral structures
- Execution of **cross country pipeline** work such as **storm water, potable water, foul sewer, land drain**, treated sewage effluent(**TSE**), **irrigation , sewerage** network and **surface water**
- Laying of **DI, BWSC, HDPE, UPVC, GRP , vitrified clay pipes**, reinforced concrete(**RCC**) **pipes** with appropriate **hydraulic** and **gas pressure tests**
- Construction of **manholes, access shaft, gullies, pumping station, RCC tanks**, collecting manholes, **washout , ventilation , air valve** chambers related to **STP, ETP, WTP** structures
- Executing of underground utility ducts and **cables trenches** like telephone, army force, DSSS ducts, **SCADA**, electrical cables (**MV,HV, LV**),traffic system cable laying and signal gantry foundation
- Laying of **flexible/rigid pavements** using **sub grade, GSB, ABC, asphalt** base course and wearing course; mass back filling, **median barrier, curb stone, interlock** fixing, cycle path and foot path pavements
- Construction of **speed humps**, installation of **traffic sign boards**, concrete posts/**bollards**, reflecting **studs road lane marking** and temporary traffic diversion
- Execution of landscaping work such as hardscaping (**stamp concrete, raiser planter**) and softscaping (**trees , plants , grass**); **As built drawings** preparation and submission

EPC Contractor	Larsen & Toubro Limited
Title	Century Bhavan-Office Complex (B2 + G + 28 + 3 Floors) Mumbai - India
Client	M/s. Century international; Project value - 180 Crore INR
Nature of work	Construction of office complex building - EPC (High rise building-134 meters)
Title	ESTANCIA - IT SEZ PARK; Chennai -India
Client	M/s. Estancia Arun Excelllo; Project value - 110 Crore INR
Nature of work	Construction of IT park & Residential flats - (EPC)
Title	Tata Consultancy Services-IT PARK; Chennai -India

Client	M/s. Tata Consultancy Engineers; Project value - 360 Crore INR
Nature of work	Construction of IT park – Engineering ,Procurement and Construction (EPC)
Role	Senior Engineer – sub structure, super structure and finishing works
Responsibilities,	<ul style="list-style-type: none">➤ Making micro level programs for sub structure and super structure adhering master construction program by ensuring QA/QC and HSE policies➤ Water proofing, anti termite and RCC works on pile cap, grade slab, retaining wall, ramp, car parking, lift and shear walls; construction of vacuum dewatering floor (VDF) and screed for IT ducts➤ Post tensioning(PT) works for slab, beams including aligning the PT cables and grouting; casting of pedestal, foundations for fabricated and rotating equipment with all related MEP embedment➤ Construction of electrical substation, pump house, sewage treatment plant(STP), Hub room, AHU room, lift room; coordination with MEP department for various NSC works➤ Execution of block work, plastering, screed, VDF, epoxy, floor tiles, painting and cladding; Maintaining ISO reports , variation on measurements, closing NCRs and Preparing sub contractor bills

Educational Qualifications

B-Tech in civil : Karnataka university (Pursuing- up to 6th sem 71.0 %)
engineering

Diploma in civil : Government polytechnic college – 83% (Anna University)
engineering

Higher secondary : Tamilnadu state board- 67%
certificate

Senior secondary : Tamilnadu state Board- 85%
certificate

Course on AutoCAD : CADD training institute; India

Course on IOSH-MS : Doha industrial safety services(DISS); Qatar

Course on H2S (Level 2 : Safety Zone S & S consultancy; UAE
)

Technical proficiencies : MS office, MS power point, MS outlook, Auto cad, Internet, SAP, Aconnex,Wrench
