A dynamic and skilled professional offering over 5 years of experience in Design Engineering, Project Coordination, Master Data Management, and Query Handling.

📄 PROFILE SUMMARY

- A multi-tasking process oriented Mechanical Engineering graduate.
- Currently associated with Oceaneering International Services Ltd, India, as a Component Engineer.
- Skilled in timely execution of project by effectively allocating the task among team members.
- Strong abilities in creating, reading, and interpreting engineering drawings.
- A successful team player who collaborates well with various business units.
- Effective communicator with strong analytical, problem solving, and organizational abilities.

★ AREA OF EXCELLENCE

Design Engineering	Process Improvement	Master Data Management
Project Coordination	Query Handling	Training & Development
Resource Allocation	Global Sourcing	Team Building

📄 PROFESSIONAL EXPERIENCE

Oceaneering International Services Ltd., Chandigarh, India

Component Engineer

Jul 2016 - Present

Roles & Responsibilities

- Monitoring projects and ensuring that weekly goals are met.
- Collaborating with clients across multiple locations in US and Europe.
- Communicating with manufacturers and suppliers across the world to source product on time.
- Responsible for imparting process training to new joiners.

Achievements

- Handled 2 projects efficiently and contributed towards saving 170 productivity-hours.
- Received multiple appreciations from clients in USA and Europe for delivering the project on time.

Oceaneering International Services Ltd., Chandigarh, India

CAD Engineer

Oct 2014 – Jun 2016

Roles & Responsibilities

- Allocating project tasks among team members.
- Submitting weekly project reports to the client in Brazil.
- Creating isometric drawings in AutoCAD.
- Designing and drafting of components related to subsea umbilical in SolidWorks.

PROFESSIONAL EXPERIENCE CONTINUED

Achievements

- Promoted to Component Engineer within 1.5 years of service.
- Received maximum number of awards in a year for delivering engineering drawings with highest efficiency.
- Supported and served 4 different teams within engineering department.
- Managed 2 projects off-site from initiation to close for one of the clients in Brazil.

Enexco Teknologies India Ltd., Gurgaon, India

Dec 2012 – Sep 2014

Senior Associate

Roles & Responsibilities

- Preparing and checking Bill of Materials.
- Creating General Arrangement and component drawings of Truck Loading Machine for clients in India.
- Coordinating with the manufacturing department to resolve design and manufacturability related issues.

Achievements

- Customized AutoCAD using Auto LISP to help engineers to automate their repetitive tasks.
- Optimized the design of Truck Loading Machine by minimizing the material wastage, thereby increasing the net profit.

Metaltech Design Private Ltd., Greater Noida, India

Apr 2012 – Nov 2012

Production Engineer

Roles & Responsibilities

- Applying reverse engineering to create 3D models in SolidWorks.
- Preparing Bill of Materials and manufacturing drawings.
- Using Solidworks to create 3D-models of home decor products for clients based in France and UK.

Achievements

- Learned how to operate a CNC machine so as to meet clients' demand during workers strike, and managed to minimize the loss.
- Designed and proposed 5 home decor products, and successfully received contract from one of the clients to manufacture 3 products in-house.

CERTIFICATIONS

- SolidWorks Mechanical Design – Associate
- Foundation Course in Mechanical CADD

TECHNICAL SKILLS

- Computer aided design/engineering: AutoCAD 2015, SolidWorks 2016.
- Other: ENOVIA, PeopleSoft, Microsoft Word, Excel and PowerPoint.

EDUCATION

IITT College of Engineering, Kala Amb, India

July 2007 – June 2011

Bachelor of Technology, Mechanical Engineering

- Lead a team of 5 students for final semester project.
- Delivered seminar to motivate students to overcome the fear of failure.
- Participated in activities in rural areas to encourage girl's education.
