**Project Description**

A web-based fruit and vegetable marketing network would facilitate sales transactions between growers and retailers. It would allow local producers to enter into markets previously limited due to competition from established and entrenched distributors. Both producers and retailers will benefit from an enlarged distribution system. Retailers' choices will become greatly enhanced as the competitive "playing field" with out-of state distributors is leveled as fresh local, organic, and/or sustainably produced produce become readily accessible. Purchasing of goods online, user can choose different products based on categories, online payments , delivery services and hence covering the disadvantages of the existing system and making the buying easier and helping the vendors to reach wider market.
